01 Overall flow

AI-FCM Bedrock v1.3.0 | Current implementation | 28 September 2026

02 Section priority

Scalar fields | Model separates sources; Python resolves permitted missing values

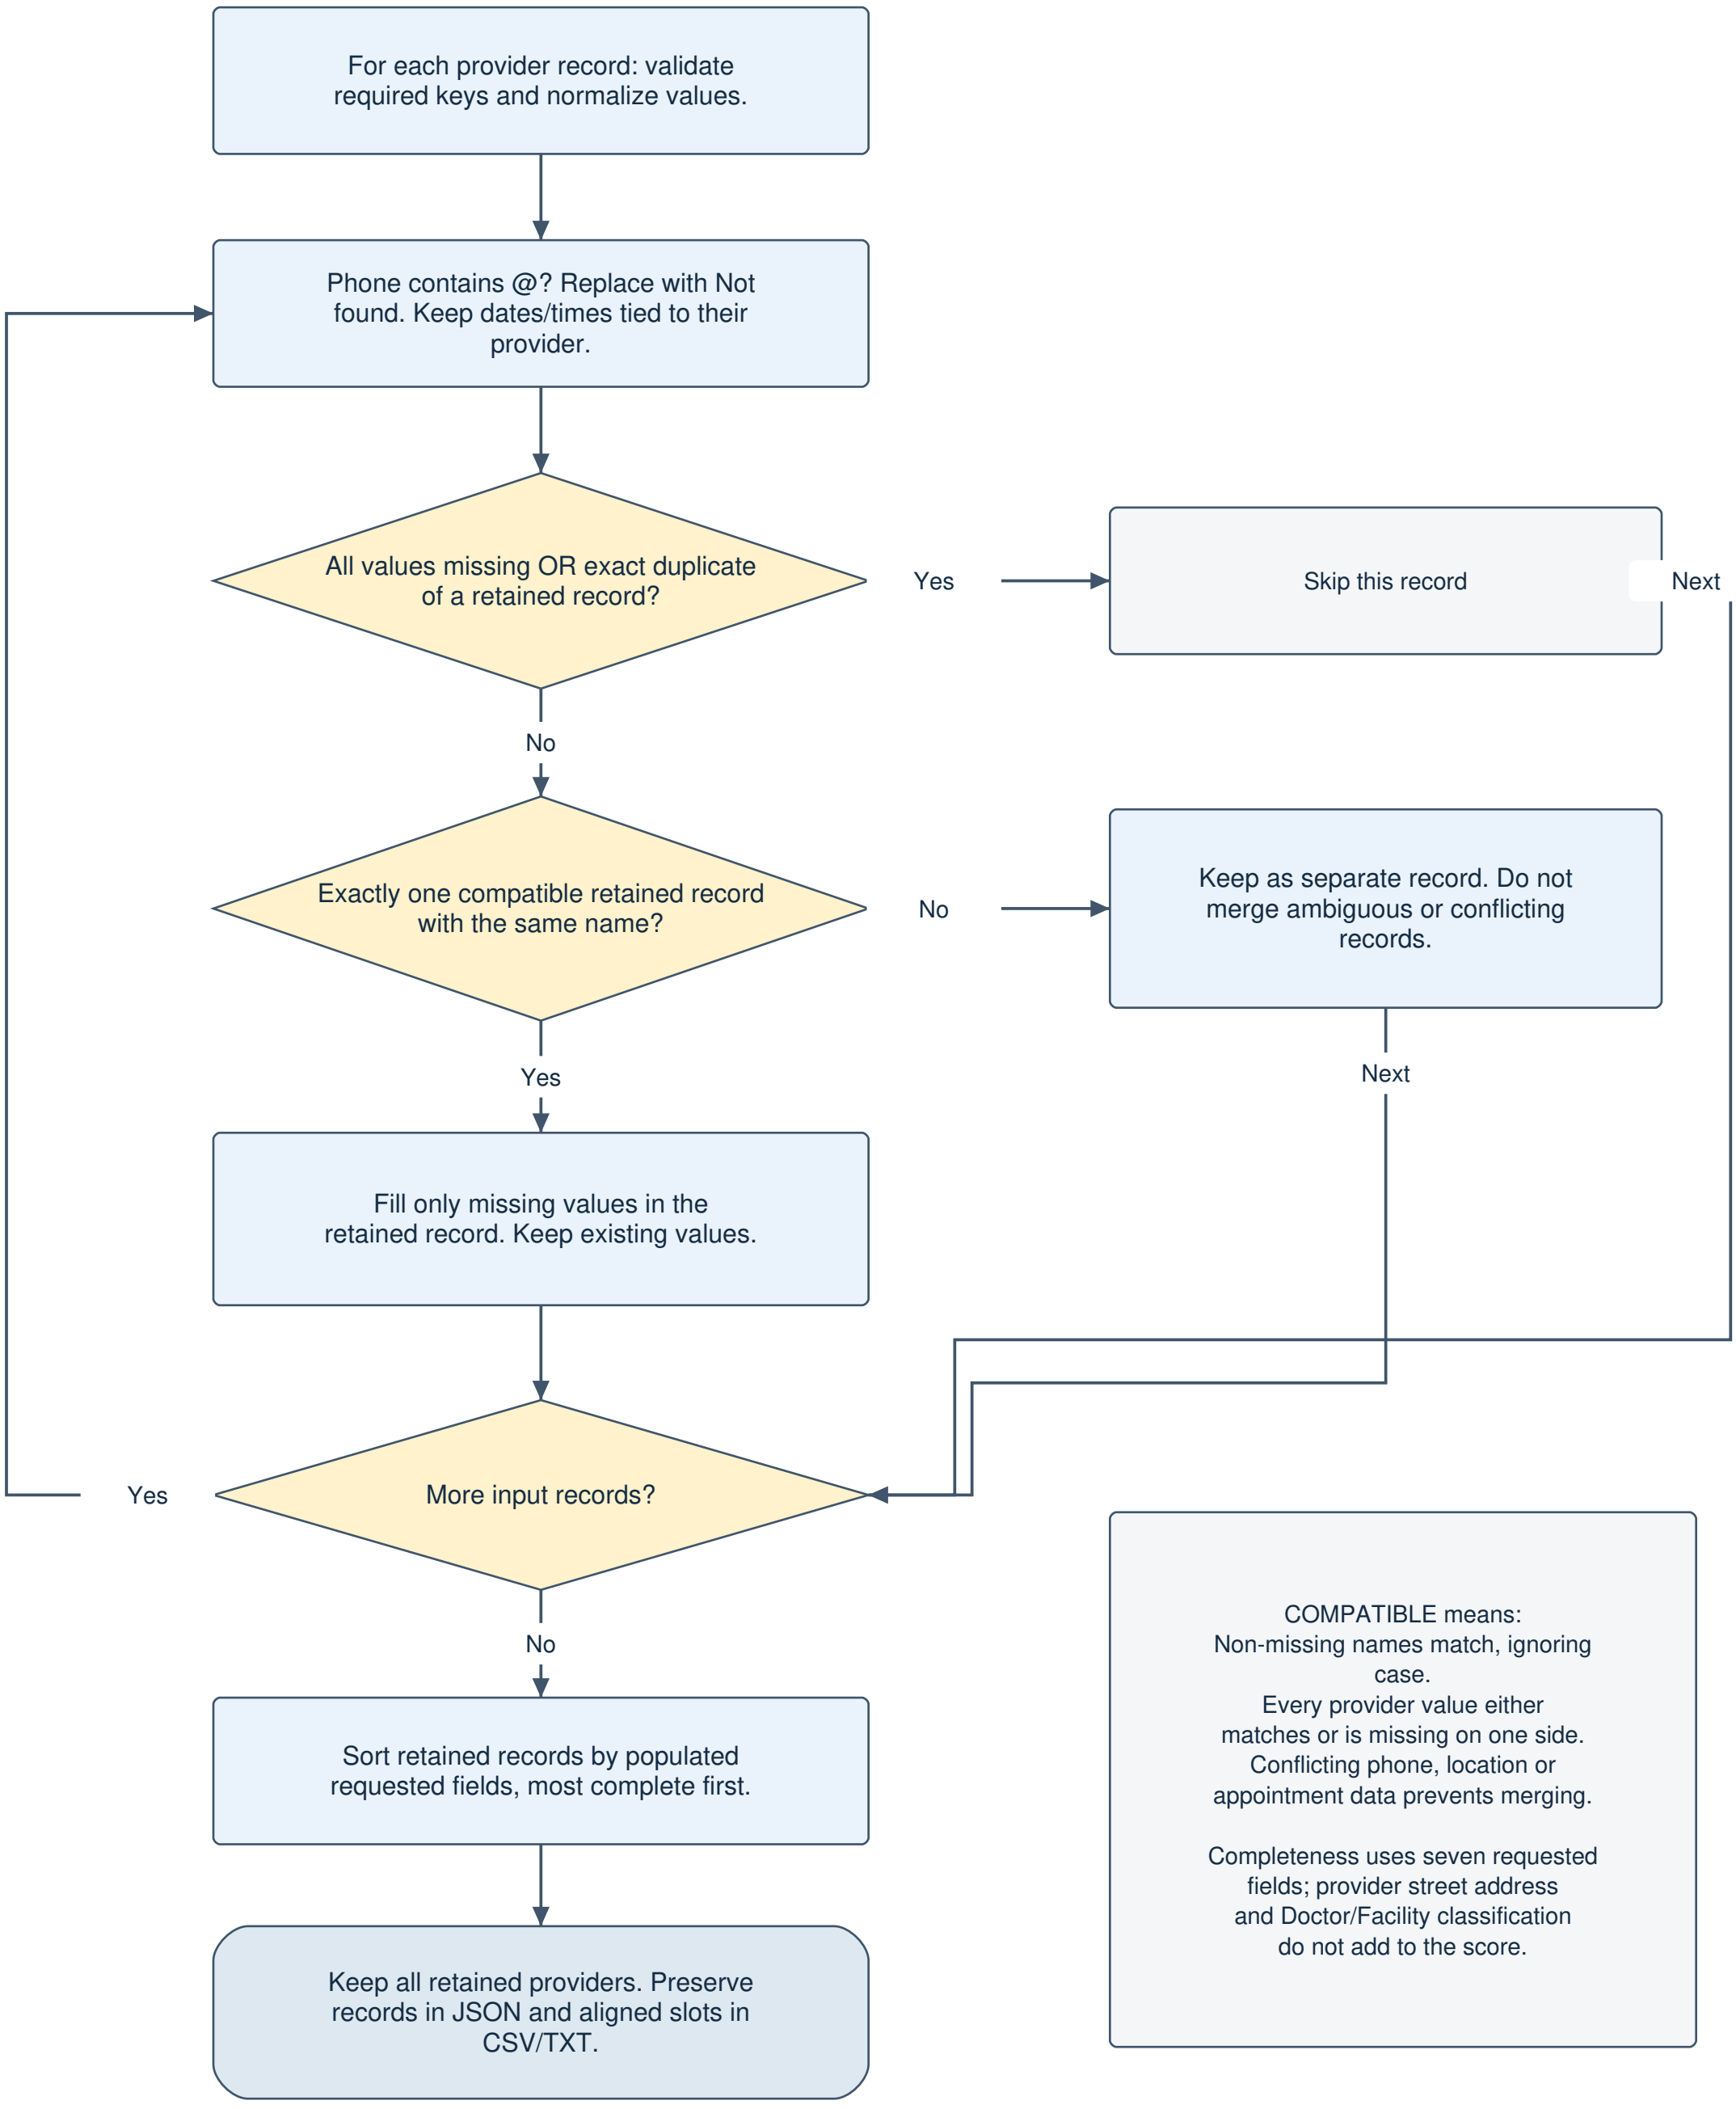

NO FALLBACK
All claimant/customer fields
Claim Number, Claim ID, Claim Type

FALLBACK ALLOWED
Injury date, jurisdiction, accident description, injury description, diagnosis code
All case manager fields
Attorney + referral metadata
Providers: see page 3

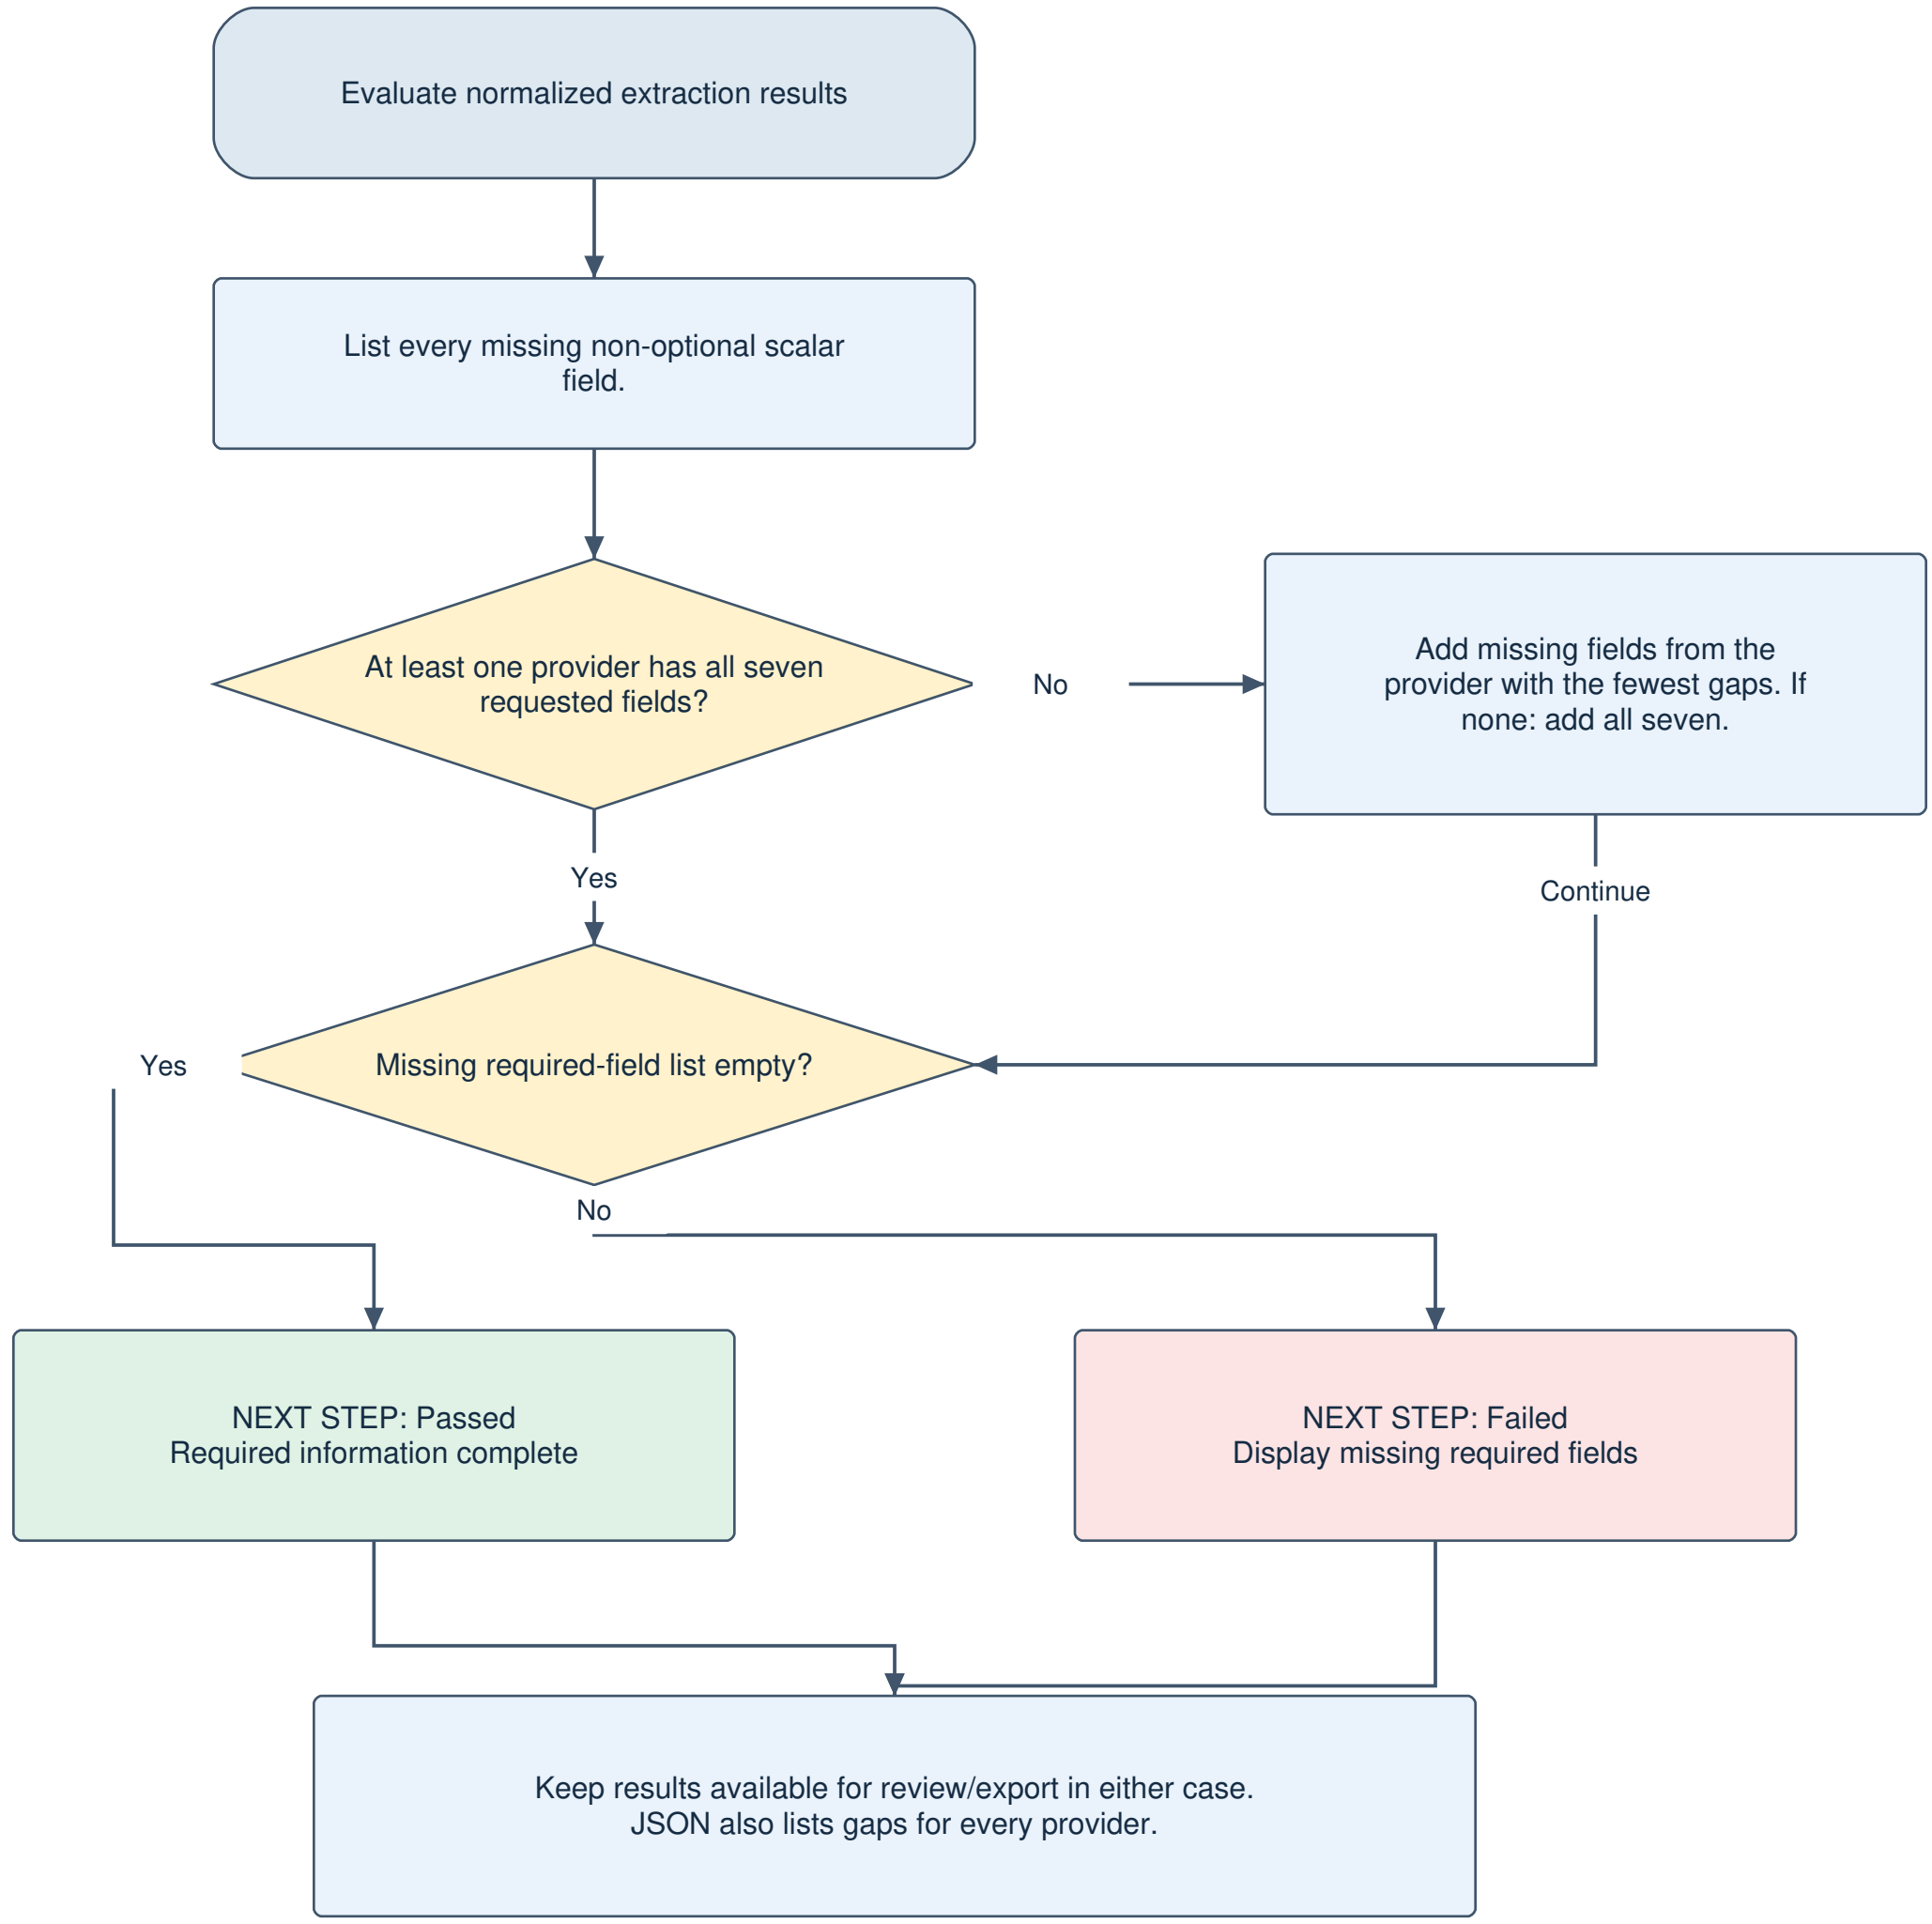

03 Provider processing

Primary-section records first, followed by Special Instructions records

04 NEXT STEP

Completeness of extracted information | Not a confidence score or factual verification

OPTIONAL / NOT GATING
Claimant Address-line-2
Office Phone Number
Nurse Case Manager E-mail Address
All attorney + referral metadata
Four legacy extras: nurse name, employer email, provider street address, Doctor/Facility classification

PROVIDER: ALL SEVEN IN ONE RECORD
Provider / Facility Name
Phone Number
City, State, Zip
Appointment Date, Appointment Time

Separate partial records cannot collectively satisfy this requirement. Other incomplete providers do not fail a referral if one is complete.
